

Md Altamash Husain Samani

New Delhi, India | +91 6394243268 | altamash9794@gmail.com | LinkedIn | GitHub

Summary

Computer Science and Engineering graduate who builds, secures, and deploys full-stack web applications end to end, in JavaScript/Node.js and Python/FastAPI. Experienced with REST APIs, JWT authentication, SQL schema design, LLM integration, and running untrusted code under OS-level limits. Seeking backend, full-stack, or AI engineering roles.

Technical Skills

Languages	C, C++, Java, JavaScript, SQL, Python
Frontend	HTML5, CSS3, React Hooks, Recharts, Tailwind CSS
Backend	Node.js, Express, FastAPI, REST APIs, SQLAlchemy, JWT Authentication
Databases	MySQL, SQLite, libSQL/Turso, PostgreSQL
AI & Data	Pandas, NumPy, Matplotlib, Gemini API, Prompt Engineering
Tools	Git, Postman, AWS S3, Render, Linux

Projects

The Green Room – AI Mock Interview App

Node.js, Express, SQL

GitHub | Live Demo

- Built and deployed a full-stack web app for adaptive voice-based mock interviews across **7 job roles and 4 experience levels**, transcribing spoken answers in-browser and prompting an LLM for each follow-up question in real time.
- Developed a REST API in Node.js and Express with JWT authentication, bcrypt-hashed passwords, per-IP rate limiting, and server-side validation of all model responses.
- Designed a SQL schema (libSQL/Turso) for user accounts, interview transcripts, and AI-scored feedback, and built an admin analytics dashboard plus a model-fallback chain that keeps sessions running through provider rate limits.

Dialect – LLM-Powered Data Analysis App

Python, FastAPI, Pandas

GitHub | Live Demo

- Built a full-stack analytics app that converts plain-English questions about an uploaded CSV, Excel, or JSON dataset into pandas code, executes it in an isolated subprocess, and feeds any error back to the LLM to self-correct within 3 attempts.
- Engineered a three-layer sandbox for executing untrusted LLM-generated Python, combining an AST validator, a restricted-namespace runtime, and OS-level memory and timeout limits, hardened against **24 tested escape techniques**.
- Deployed the production layer: JWT authentication, per-user PostgreSQL persistence, pluggable local, database and S3 storage, answer verification with an LLM critic, and cost/latency telemetry on a live dashboard, validated by **145 automated tests** in pytest.

Education

Galgotias College of Engineering and Technology, Greater Noida

2022 – 2026

Bachelor of Technology, Computer Science and Engineering (Data Science)

Relevant coursework: Data Structures, Design and Analysis of Algorithms, Object-Oriented System Design, Database Management Systems, Operating Systems, Computer Networks, Data Analytics

CGPA: 7.0/10

Little Flower School, Gorakhpur

2019 – 2021

Indian School Certificate (Class XII)

CGPA: 8.5/10

Certifications

Data Structures & Algorithms – Abdul Bari	Udemy
Web Services APIs & Web Development – Angela Yu	Udemy
Database Programming Using SQL	Oracle
AI/ML Certification Course	Smart Internz
